Product Spotlight: Welker Servo Lifters & Slides

Sales Spotlight: Terry Beltrano

New Product Release: UB2 Compact Shot Pin

Product Spotlight: Welker Servo Lifters & Slides

Welker introduces a new line of electrically actuated slides and lifters that deliver precise repeatability and huge cost savings. The efficiency of electric systems deliver up to a 90% cost savings over air driven components. Servo actuators eliminate the need for air lines, valves, switches, hoses, air filter/regulators, compressors, and maintenance costs associated with pneumatic systems. The initial investment of electric components is typically recaptured within the first year of operation.

Robust and durable, Welker servo slides and lifters provide precise multi-positioning, ideal for multiple models running in the same assembly line. Round-way slides and lifters feature lube-free composite bearings and hard chrome shafts; no way covers are required even in harsh environments. Servo actuators are also offered on rolling element rail slides and single/double axis shim positioners.

Welker continues to expand its innovative product offerings with the introduction of servo actuated slides and lifters, keeping pace with manufacturing trends toward energy efficient, sustainable, and cleaner technologies. [Click image for more info.](#)

Sales Spotlight: Terry Beltrano

Meet Terry Beltrano, Welker sales/process engineer and product technical support for Canada. A resident of Ontario, Terry is a Certified Manufacturing Engineer with over 20 years experience managing, launching and troubleshooting automation. He has a background in program management and assembly

and food processing fields. Terry's customers enjoy the benefits of consulting, engineering and production floor support. He's been very busy riding the wave of manufacturing growth across Canada - Go Terry!

New Product Release: UB2 Compact Shot Pin

Welker Shot Pins have become an industry standard, used in over one million successful applications. The new UB2 is the smallest, shortest square ram offering in the Gold Line series. Available in 25, 50, and 75mm stroke lengths, the UB2 is ideal for use as a retractable locating pin or straight acting clamp in applications where space is limited. Anti-rotate ram is electrically insulated from the body and resistant to corrosion and weld spatter. Multiple NAAMS compatible hole patterns options are offered. Durable steel & aluminum construction, requires no lubrication and minimal maintenance. Safety orange steel shroud protects seal from weld spray. The UB2 is the lowest cost, lightest weight full feature shot pin available. Click image for more info.

Upcoming Trade Shows

Welker will be at Fabtech in Chicago, November 18-21, booth #N2871. Check out our new products and say hello!
