New Product Release Recap

Product Spotlight: Mini Part Ejector/Positioner

Offering the proven quality and durability of standard ejectors, Welker introduces the mini part ejector/positioner for smaller applications. The unit's cam actuated motion lifts tip plate up and tips out 30 degrees. The steel tip plate is treated to withstand harsh environments and provides a NAAMS standard hole pattern to mount tooling. Capable of handling loads up to 90 lbs. with a 100 in-lbf. maximum torque. Its compact design features an integrated pneumatic cylinder with standard NPT or G ports, along with an optional solid state cylinder switch. The mini ejector [MPE](#) is ideal for part reject escapement in manufacturing lines. The added V-block on the [MST](#) mini positioner assures repeatability in locating and clamping applications.

Sales Spotlight: Wyco

Covering North and South Carolina, Wyco Innovative Solutions has been part of the Welker sales team since June of 2011. Jim and Austin Wyman have decades of technical expertise with industrial automation applications. Their formula for success is "Supply proven, high quality products and unparalleled service to our customers." We agree!

New Product Releases:

If you missed last year's new products, here's a recap: MPE & MST, mini versions of the part ejector and part positioner; UB2, a compact square ram shot pin; auto indexing dimpler; tube & wire clamps; BP2 compact lockout pin; turn table; wedge lock; X-Y servo shim positioner.
