New Product Release: Part Presentation Slides

Product Spotlight: Lockout Pins

Welker offers a variety of options for workholding motion security in a range of load capacities. The BP and DS Series lockout pins are compact double acting, pneumatic retractable units with optional spring extend: air loss triggers mechanical pin extension. The Welker advantage is the integrated cylinder/pin design – no problematic coupler. BP Series units are available with standard tolerance pins for lockout or precision tolerance pins for locating applications up to 5,000 lbf. For larger loads, the DS3 has a double shear lockout for up to 10,000 lbf side load capacity. Options include solid state cylinder switches, flat or conical pin nose and choice of receivers. Welker lockout pins are suited for turntables, trunnion fixtures, dunnage carriers, indexers, and C-frame presses. [Click here](#) for more info.

Sales Spotlight: Welker Product Demonstrations

Interested in a hands-on demonstration of Welker products? Our smaller automation components can be presented during a Lunch & Learn program. For an in depth introduction or to get acquainted with our new product offerings, contact us for the Mobile Product Exhibit availability in your area. [Click here](#) for more info.

New Product Release: Part Presentation Slides

The new Welker Part Presentation Slide offers a cost and space saving alternative to feed conveyors. Utilizing electric actuators, they deliver a 90% reduction in energy usage compared to long stroke pneumatic slides. Dual slide units allow push/pull bin presentation, which provides uninterrupted flow of material to work cell, maximizing productive throughput.

mounted to pull dunnage carts. Presentation slides can also be used vertically, loading from the mezzanine is the ultimate floor space saver. Providing no pinch points or catch points, the part presentation slide is safer for the operator than indexing or accumulating conveyors. [Click here](#) for more info.

Upcoming Events

R&E Automated Tech Expo: Welker products will be featured in four training cells for robotic MIG welding, material handling and roller hemming. The event will be at R&E's new training facility located in Macomb, MI June 2-5, 2014.

Fabtech 2014: Welker will be exhibiting at this year's show held in Atlanta, GA November 11-13, 2014. Add booth C2135 to your show planner! Fabtech is North America's largest metal forming, fabricating, welding and finishing event.
