**New Product Release: Roll Dimpler**  
**Sales Spotlight: Wendell Browning joins Sales Team**

## New Product: Roll Dimpler

The Welker Roll Dimpler minimizes blank sticking by adding rows of small dimples to sheet metal in coil fed operations. The compact design mounts between the decoiler/straightener and press. Minimizing double-sheet misfeeds prevents die damage and downtime. Eliminates the need for expensive air knife systems. Ideal for nonferrous materials where fanner magnets are ineffective. The roll dimpler can be used with any coil fed material. For more info visit [http://www.welkerproducts.com/roll\\_dimpler.php](http://www.welkerproducts.com/roll_dimpler.php)

## **Sales Spotlight: Wendell Browning**

Welker is pleased to welcome sales engineer Wendell Browning to the team. A former account manager at DE-STA-CO, he brings more than 20 years of mechanical product experience in the automotive and aerospace industries.

Wendell lives in the Metro Detroit area with his wife, Jada. Their son Jeremy lives in New York and daughter Kyla is moving to Houston, having just completed college. Outside the office Wendell enjoys traveling, working out, and meeting with the men's group of his church.

## **Upcoming Trade Shows**

Welker will be exhibiting at this year's Fabtech Expo in Chicago, November 9-12. Stop by booth N28054 to see our new products and say hello!
