## New Product: PCZ Pin Clamp

Welker introduces a revolutionary new line of compact pin clamps. Lightweight unit weighs just 3.4 lbs. including integrated pneumatic cylinder. The PCZ provides positive part location and clamping, up to 14mm part thickness. Flush dual fingers extend on both sides of pin to clamp part. Unlike single hook designs there is no entry for debris. Ideal for flanged holes, end effector applications, and material handling. Locating pins are available in bullet nose or low profile styles, diameters 8.00 to 16.00mm. Retract option allows low profile pin to disappear into unit for easy part release. For more info visit <http://www.welkerproducts.com/pinclamps.php>

## Sales Spotlight: Willcox & Allen

Welker is now represented in the Southeast by Chip Allen and Ken Dickey of Willcox & Allen Inc. They will be serving the growing industrial sectors in Tennessee, Georgia, Alabama and Mississippi. Willcox & Allen have been offering sales & support of automation components, material handling systems and precision cleaning equipment since 1977. Contact their Chattanooga office at (423)265-2113.
