

To all our customer base,

As most of you are aware that have companies based out of Michigan, we have entered in a Governors Executive order for the shutdown of all non-essential manufacturing operations as of Midnight 3/23/2020 for a period of three weeks. The Executive Management Team at Welker shall comply with this order and are projecting to be back to full operations on 4/13/2020. With this said, we have no choice but to suspend and postpone all customer orders and deliveries following the end of business today (3/23/20 at 4:30pm) for the time period falling under the Governor's order stated above.

Our inside sales order desk will remain open during this shut down period, remotely, to answer all questions and supply as much feedback as possible. As we gather more information about ongoing operations, we will be sharing any information immediately with our customer base so please be patient.

As we are entering an unprecedented time in our great nation, we believe that we have a superior government that has a tremendous task force in place to combat this horrible epidemic.

Respectfully,

Scot Bigelow
Welker Engineered Products
Sales and Marketing Manager
